

"Accessing Innovation"

Optimize Yields with Ascend

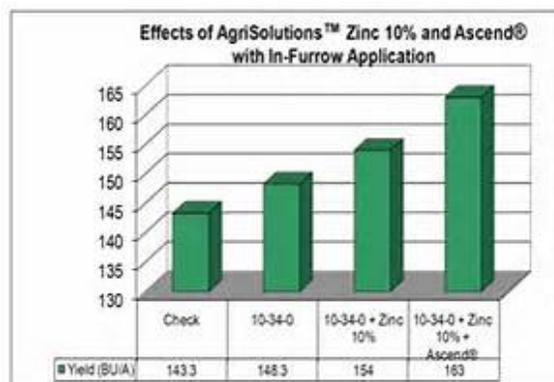

As far as plant nutrition and performance goes, Ascend sets itself apart with vigorous early plant growth germination and emergence. It helps create a more robust crop overall. Our growers are always looking for a way to get a step ahead, and this allows you to have a significant jump on the growing season also it can be applied in-furrow.

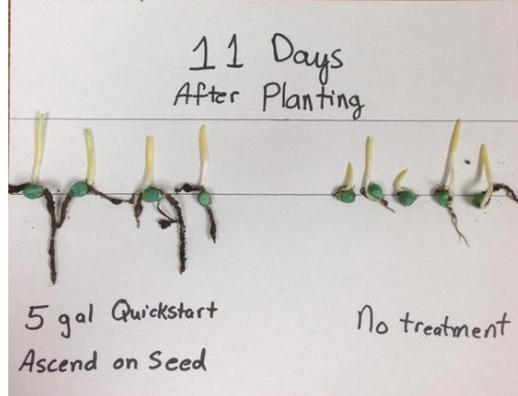

Some product highlights include:

- Contains a unique ratio of 3 plant growth regulators: Gibberellic Acid (GA) for germination and emergence, Cytokinin Kinetin for cell differentiation, and Auxin Indole Butyric Acid for early root growth
- The GA in Ascend is more stable in mixes with water and is stable at higher and lower pH's
- Backed by extensive Answer Plot Data: 3 years of data show an average of a 4.8 bushel increase across 195 different sites
- Widespread grower success and adoption across many different crops, including soybeans, wheat, and corn
- Ascend optimizes the phosphorus and zinc within a starter system
- Ascend application should be followed by tissue sampling to assess the continued nutritional needs of the plant for optimized yield

Additional benefits of in-furrow application:

- Early stand establishment and higher stand population in corn
- Early flowering in corn
- Larger root systems, stalks, and leaves

Offer Management App

Ag Partners Coop strives to keep information and options in front of our patrons. The grain department provides several nontraditional avenues to provide better access to market information and cash movements.

The Ag Partners Offer Management App allows producers access to the markets on their phone, with the opportunity to place target orders at any given time. The last couple months have proved target orders work and this app provides that service to you 24/7. You can download the app on any iPhone or Android device. The same service can be used through our website.

A grain text messaging service has also been launched recently to help producers keep updated on direct ship bids, dump hours changes, and any other pertinent information. Initially, we had some glitches, but some fine-tuning has been done to provide better service. If you would like to sign up for this service go to our homepage and click the link on the right-hand side above the grain bids.

Ag Partners will continue to look at other platforms to better serve you. If you have any questions about these opportunities, please give us a call. Have a great weekend.
